a horizontal member;  
a vertical member adjustably coupled to the horizontal member such that a relative angle of the vertical member with respect to the horizontal member may be changed by an operator of the device;  
wherein the vertical member is adapted to hold an image receptor; and  
wherein the horizontal member includes a multi-sided protrusion and the vertical  
member includes a multi-sided hole, whereby interaction of the protrusion with the hole  
allows the relative angle of the vertical member with respect to the horizontal member to  
be changed by the operator.

Please cancel claim 32.

REMARKS

Claims 1-41 are pending in the application. Claims 21-29 and 33-41 have been allowed, claims 1-20, 30 and 31 have been rejected, and claim 32 has been objected to. Applicant respectfully traverses each ground of rejection and requests reconsideration and further examination of the application under 37 CFR § 1.111. Applicant responds to each ground of rejection and objection as follows.

**A. Allowable subject matter.**

Applicant would like to thank the Examiner for indicating the allowable subject matter of claims 21-29 and 33-41.

- B. Claim 30 was rejected under 35 U.S.C. § 102(e) as being anticipated by Kossila (U.S. Patent No. 5,737,388). Claim 31 was rejected under 35 U.S.C. § 103(a) as being unpatentable over Kossila.**

It is respectfully submitted that claim 30 has been amended herein in order to incorporate the limitations of allowed claim 32. It is therefore respectfully submitted that claim 30 is allowable over the references of record. Furthermore, claim 31 depends from claim 30 and is therefore also considered to be allowable.

Claim 31 depends from claim 30 and therefore includes all of the limitations of claim 31. It is therefore respectfully submitted that claim 31 is allowable for at least the same reasons set forth above with respect to claim 30.

- C. Claims 1-20 were rejected under the judicially created doctrine of obviousness-type double patenting over claims 1-8, 10, 11 and 13-17 of U.S. Patent No. 5,631,943.**

It is respectfully submitted that Applicant is submitting herewith a terminal disclaimer which disclaims the terminal portion of any patent issuing for the above-recited claims which would extend beyond the term of U.S. Patent No. 5,631,943. It is therefore respectfully submitted that claims 1-20 are now allowable.

For the foregoing reasons, Applicant respectfully submits that the present application is in condition for allowance, and respectfully requests such action. Should it facilitate allowance of the application, the Examiner is invited to telephone the undersigned attorney. A check in the amount of \$110.00 is enclosed for the statutory disclaimer fee, as set forth in 37 CFR 1.20(d). No additional fees are believed to be

necessary, however, should any fees be deemed required, please charge such fees to  
Deposit Account No. 23-3030.

Respectfully submitted,

By:
